DETAILED ACTION

1. Claims 1-35 are allowed.
2. The following is an examiner's statement of reasons for allowance: Claims 1-35 are allowable since certain key features of the claimed invention are not taught or fairly suggested by the prior art. In claim 1, "when said first to n-th pixels display a same image independently, said second optical unit is placed in relative to said first optical unit at a second position which is set apart from said first position in a layout direction of said second optical elements by half a distance of a layout cycle of said second optical elements or by a distance equal to an integer multiple of said layout cycle of said second optical elements added to said half the distance and where said first and second optical unit output lights, output from said first to n-th pixels, in a same direction". The closest prior art Hirakata et al (6,005,645) and Woodgate et al (US-2004/0240777) disclose 2-D/3-D image switching display devices, however singularly or in combination fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
